Industry Problems

Outdated Rental Platforms

Global practices still include listings in the form of simple online classified ads which provide limited rental experience and essentially no value in terms of application process.

\$500bn Frozen in Rental Deposits

Tenants freeze billions of dollars on rental deposits every time they rent. There is no internationally recognized insurance or savings that could be applied to quality renters.

Our Solution

Rentberry streamlines the entire long-term rental process using blockchain and smart contracts technology and eliminates the need for a middleman making it possible for tenants and landlords to complete all rental tasks in one place.

Blockchain + Smart Contracts

- Application Process
- Rental Auction
- Agreements
- Rent Payments
- Crowdsourced Network
- Service Providers
- Reviews & Ratings
- Utility Bills
- Convenience
- Security
- Rewards
- Global Expansion

Transparent Application Process

Creates a healthy rental environment in which all prospective tenants can customize and negotiate their rental offers based on the competition and as a result rent the place at fair and true market price.

Crowdsourced Rental Deposits

Members of the Rentberry community may cover a portion of rental deposits in exchange for rewards, thus unblocking billions of dollars and reducing financial burden for tenants.
